## Introduction

Product design or politics, Dutch or Spanish, making music or taking photos; versatility is what describes me well. Because of my broad interests, I can add value in many different ways. This does not mean that I cut corners though. In all of my work, I strive for the highest quality and people know me as quite a perfectionist. I work well in a team, but also work well alone. When necessary, I take responsibility. In addition, I am reliable, helpful, friendly, flexible and creative.

## Experience

### January 2023 - Current

#### Freelance Product Designer, VROEGH Design

Working on market research, benchmark research, legislative research and product design for a micromobility project.

### February 2022 - September 2022

#### Graduate intern at Inflight Services, KLM

Improving the design of the menu card and designing a concept for an onboard digital menu for the World Business Class.

### February 2021 - June 2021

#### Intern Visualisation & Communication at KLM

Contributing to good communication to employees during a big change within the organisation through design and research.

### February 2020 - March 2022

#### Committee member at municipality Noordoostpolder

After having been active as webmaster, I was a committee member in the municipality. Subjects include sustainability, urban planning and infrastructure, amongst others.
